We deliver solutions across the enterprise and in multi-vendor environments with unparalleled customer service.*

Time to Upgrade....

As we all know, technology these days is ever changing. As a business owner, or employee it is imperative to know about the new waves and upgrades that technology throws at us. As of July 13, 2010, Windows will no longer be supporting Windows XP. What can be done? Well simply upgrade to Windows 7. This may seem like a sales pitch, but in reality ESEI is informing you of what to be aware of. It is not free or inexpensive, but it is important to know that to run your day to day activities support is something you and your business will need.

Now, ESEI needs to clarify that the termination of Windows XP support does not signify that this program will no longer exist. XP will continue to run and function. The downfall will be that if you encounter any technical problems you will have to contact a Microsoft Partner Certified employee and pay for the support that is needed. That may be more costly in the long run, as opposed to upgrading to Windows 7.

Along with the Windows upgrade, Office 2010 is available with business licenses and in June of this year it will be available for public use. To learn more about all of Microsoft's changes go to their website and find out what you need to do. Don't be left behind and get informed. In today's world, having up to date technology is a must and a necessity for a business to succeed.

Technology Tips

The right IT Technology Management Plan can assist your business by saving time and money and resources. The health of your IT Department is critical for the continuity of your business. The best business practice to stay IT healthy is to avoid getting sick. Be proactive to prevent technical problems and network downtime from occurring with proactive maintenance.

New Client Welcome

Thank you to EP Logistics, Perspectiva, Integrated Human Capital, and Border Regional Advisory Council for selecting ESEI as your IT solutions provider. We appreciate your business!
